Schwinn Collegiate Serial Number

It should be noted that lugged frame impored Schwinn Collegiates from the 80s used a standard non-Schwinn sized tire. I recommend blackwall, much more durable 1/24 skinny wheel Schwins also used a special Schwinn-specific tire size. S-5 and S-6 26 rims are the same size, just the cosmetics are different.) These came with Schwinn-specific 26 x 1.58 tires with a Bead Seat Diameter (BSD) of 597mm. Tires are available for the 20 and 24 S-7 rims, although these arent as nice as the 26 size and are usually only available in blackwall. Schwins use an unusual tire size, but one that is still in common use on specialty bikes like recumbents. That 7mm makes all the difference between a tire that fits and a tire that doesnt. Brake shoes are standard (Kool Stop Continentals are recommended, although youll have to file a bevel in the face so they work great from the get-go. These rims take standard tires The BSD is 599mm No need to search around for a special size.

With stock Schwinn rims, its usually advisable to only top out the tire pressure at 70psi, regardless of what pressure the tire is rated to. What tires do I need for my Schwinn rim Schwinn used their own special rim sizes on many bikes. The first three digits are the numerical day of the year, and the last digit is the last digit of the year. Schwinn, Varsity, Suburban, Continental, etc The steel S-6 27 Schwinn rim is the only S-6 rim that takes a common tire. Middlweight Schwins, Typhoon, Corvette, Hollywood, American, Tiger, etc Schwinn Middlweight cruisers used S-7 rims and 26 x 1.34 tires (not the same as 26 x 1.75 tubes Where can I find parts for my old Schwinn Many parts are standard and are commonly available at bike shops.) Tubes are standard Specific parts are available through eBay You might also want to check the Classic Classified section of the Schwinn Forum or Memory Lane Classics (see my Good Links page for a link.). The stock size was 20 x 1.125, but you can use a 1.95 with no problem What size tubes should I use Even though Schwinn bikes often used special rims and tires, you can use standard tubes with no problem.

Local and regional swap meets are another great place to find parts Schwinn parts are generally not year-specific as a matter of function. Some folks (myself included sometimes) like to get correctly dated parts for special Schwins, but for the most part it doesnt matter what year the part is. 75) These S-7 rims take a special Schwinn-specific sized tire with a 571 Bead Seat Diameter. Non-Schwinn skinny wheel 26 bikes use a similar-looking but physically smaller wheel that takes a 590mm BSD tire. Heavyweight Balloon Phantom, Spitfire 5, Cruiser, etc Schwinn Heavyweight line-up used S-2 rims. Standard 26 tires and rims have a BSD of 559mm, a big difference.) Kenda makes tires to fit the S-7 rim, the best ones are 26 x 2 x 1.34.

If you really enjoy the old Schwinn and want to know more, this book is for you. Skinny wheel Schwinn, Racer, Brezco, Collegiate, etc Schwinn Lightweight like the Brezco, Racer, and Collegiate used S-5 or S-6 rims, and are most often found in the 26 wheel size. 3 on the Reference Books page Its the largest and most comprehensive book on vintage Schwins ever assembled. Schwinn didnt make yearly changes to much of anything besides paint colors If youre looking for the largest amount of Schwinn information in one place, check out the Tech Spec 1. At higher pressures, tires tend to creep of the steel (and head-loss alloy) rims that Schwinn (and most other manufacturers in the 70s) used on their bikes. Schwinn rims have knurling (shoeb marks) down the center and are often stamped with a size designation like S-7 or S-5. Sometimes wheels get replaced with with non-Schwinn wheels, so check to see that you still have the original Schwinn rims on your bike before purchasing tires. For 26 wheel Lightweight you can use standard 26 x 1.38 tubes For 26 wheel Middlweights you can use 26 x 1.1.) Kenda makes tires to fit the 26 S-5 S-6 rims, available in blackwall or gumball.

The Fastback and Stander (as well as other Schwins that used S-5 or S-6 20 rims) use a 20 x 1.38 tire with a Bead Seat Diameter (BSD) of 451mm. c10k415etf
